

**asebal** 

**Metal Parapets**

### Technical Characteristics

Its use is recommended in existing or new bridges, culverts and overpasses, and in their accesses.

This post is prepared for two tubes and a beam, either reduced or with a spacer; its height is 1,200 mm. It can be manufactured with or without base plate.

The tube can be of  $\text{Ø}60 \times 2$  or  $\text{Ø}60 \times 3$  mm. Elbows with two outlets are used in both ends.
